## City of Needles, California Request for City Council Action

☒ CITY COUNCIL ☐ NPUA

☐ Regular ☐ Special

**Meeting Date:** December 10, 2019

**Title:** Ordinance Number 626-AC replacing Chapter 21 Entitled "Taxicabs"

**Background:** Beginning January 1, 2019, AB 1069 and AB 939 took effect. These laws require cities and counties to follow new rules regarding the regulation of taxicabs.

California Government Code Section 53075.5 requires each city and county to adopt an ordinance in regard to the taxicab services which are substantially located in the city or county. These regulations include; permit requirements, registration of rates, mandatory substance and alcohol testing, and disclosure of driver permit numbers in taxicab advertising.

In order to determine if a taxicab company is "substantially located" within the city, the taxicab company either has its primary business address within the city's or county's jurisdiction or the total number of prearranged and non-prearranged trips that originate within the city or county's jurisdiction account for the largest share of the taxicab company's total number of trips over the previous calendar year, as determined annually.

Taxicab companies not substantially located within the city or county are not subject to these regulations, however they must still obtain the consent of the City Manager to operate occasionally in the City. Taxicab companies that are substantially located in the city but are licensed in a neighboring state, are subject to the updated ordinance regulations.

**Fiscal Impacts:** The adoption of the proposed Ordinance No. 626-AC will not have any direct fiscal impacts. **The existing fee schedule will cover the cost to process and issue City permits, however, it is unknown if there will be added costs for enforcement.**

**Recommendation:** Staff recommends a motion to introduce, read by title only and waive further reading of Ordinance 626-AC repealing and replacing Chapter 21 of the Needles Municipal Code to regulate taxi cabs.

## City of Needles, California Request for City Council Action

☒ CITY COUNCIL ☐ NPUA

☐ Regular ☐ Special

**Meeting Date:** December 10, 2019

**Title:** City Council Resolution 2019-77  
A Resolution of the City Council of the City of Needles  
Approving a Conditional Use Permit for Relocation of the Existing "H"  
Street Cannabis Dispensary, from 221 "H" Street To 1019 W. Broadway,  
located in the C-2 General Commercial Zone, also known as APN 0186-094-49

**Background:** Applicant Harry Ezajian currently manages a Retail Marijuana Business in the City, the "H" Street dispensary, located at 221 "H" Street, an approximately 6,000 square foot facility, that utilizes off-site parking for customers. The area is surrounded by residential units.

Mr. Ezajian is proposing to relocate the existing Retail Marijuana Business to 1019 W. Broadway, an 11,400 square foot building, previously used as a bank, that also includes an existing parking structure for customer parking.

On January 26, 2016, the City Council adopted Ordinance No. 574 AC, allowing those existing Retail Marijuana Businesses (formerly "Cooperative/Collectives") to relocate in zones C-1, C-2, C-3, M-1 and M-2 with the approval of a Conditional Use Permit and a Regulatory License. The proposed parcel is zoned General Commercial (C-2), and thus, falls within the permitted zones for relocation.

The project site is in a developed portion of the City and situated on an approximate .26-acre parcel at 1019 W. Broadway (APN 0186-094-49). The building was previously used as a bank. Tenant improvements will include the removal of the drive-thru area by securing the window area with solid secured panels and converting the space into a stock room; the removal and securing with panels of the exterior ATM machine. The existing open area in the middle of the building will be converted to a new waiting area and new retail display area. The ingress/egress area near the on-site parking area will be modified with the addition of a door to create a small waiting room and satisfying the ADA requirement for handicapped customers and employees. The existing two offices will remain offices, as will the vault, restrooms and breakrooms. The existing doors facing Broadway will be utilized for employee-only access to the building. Customer Ingress/egress into the Retail Marijuana Business will be through the existing doors located on "H" Street. The existing on-site parking area satisfies the ADA requirements, and includes two ADA compliant parking spaces and 10 regular parking spaces for employees and customers. There are no sensitive receptors (assisted in-care facilities, hospitals, schools) located nearby. To the north is a site that received a CUP for marijuana manufacturing in 2018; to the west is a liquor store; to the east is the credit union and to the south is a marijuana cultivation facility as well as the existing Retail Marijuana Business.

Security measures have been thoroughly incorporated into the project. Security cameras and motion detectors will be placed on all entry points and around the site perimeter. Interior security cameras will be mounted and utilized in all areas except the restroom areas. Audible interior and exterior alarms will be used. Entry into the display area will be activated by a "buzz in" system.

The applicant will employ up to 7 employees with initial operating hours starting from 8 am to 6 pm, seven days a week.

## City of Needles, California Request for City Council Action

The matter was heard before the Planning Commission at a public hearing held on November 6, 2019. No public testimony was taken. The Planning Commissioners discussed the staff's recommendation that would require windows to be replaced with solid secured panels and determined that the aesthetics of the building would be harmed by removing the windows, and conditioned the project to keep the windows and provide secure panels behind the windows. It was later discovered that the Ordinance only requires replacement of windows with secured panels for cultivation facilities. Staff recommends that all windows except the drive-thru window remain in their current state.

### Conditional Use Permit Findings.

In accordance with Section 94.07, the City Council must make the following findings for a Conditional Use Permit:

1. That the requested permit is within its jurisdiction according to the table of permissible uses.
2. The application is complete.
3. The use is consistent with the General Plan.
4. The use will be in harmony with the area in which it is to be located.
5. The use will not materially endanger the public health or safety.
6. The use will not substantially injure the value of adjoining or abutting property.
7. That the project overall is consistent with the preceding findings.

**Public Notification:** A public hearing notice was published in the Needles Desert Star on Wednesday, August 15, 2018. Notices were sent to property owners within 300 feet of the proposed project and posted in two conspicuous locations.

**Critical Timeline:** The applicant wants to be in production as soon as possible.

- Fiscal Impact:**
1. The 10% of gross sales of marijuana business tax (voter approved (2012))
  2. Valuation of new buildings – added to city tax rolls.
  3. NPUA – electric/water/sewer usage revenue.
  4. Recurring business license and permitting fees.
  5. A 25% State tax – a portion of which will be passed to local government, as enacted from approval of Proposition 64 in November 2016.
  6. Statewide 10% sales tax, the city's share is 1%.

**Environmental:** This project is categorically exempt under the California Environmental Quality Act, CEQA Guidelines, Section 15301(a), (Existing Facilities, interior or exterior alterations involving such things as interior partitions, plumbing, and electrical conveyances). The proposed use will involve tenant improvements to an existing building facility.

## City of Needles, California Request for City Council Action

☒ CITY COUNCIL ☒ NPUA

☒ Regular ☐ Special

**Meeting Date:** December 10, 2019

**Title:** Needles Public Utility Authority Resolution No. 12-10-2019-NPUA and City Council Resolution No. 2019-80 adopting Epic Engineering's Culinary Water and Sanitary Sewer Capital Facilities Master Plan for the City of Needles

**Background:** The City of Needles is experiencing increased water demand due to new industrial, commercial, and residential development in the City. Most of the new development is expected to occur at the north end of the City. The development will increase water demands and sewer production that may exceed the City's water and sewer system capacities. Phase I of the Needles Preliminary Water and Sewer Study was approved on October 17, 2017, by the Board of Public Utilities and on October 24, 2017, by the City Council. Phase I of the study was completed March 9, 2018 and collected data to determine what information is available and what additional information needs to be researched or developed to proceed with the study during Phase 2.

The Phase II work scope of the Culinary Water & Sanitary Sewer Capital Facilities Master Plan was approved by Council on August 14, 2018. The Culinary Water & Sanitary Sewer Capital Facilities Master Plan provides a detailed look at the future conditions of the City including projected water demands and sewer flows and needed capital facility improvements to meet the anticipated demands for both the water and sewer system.

The report lists recommended system improvements in priority. The report identified providing more storage to the Upper Zone is a high priority as well as upsizing the existing booster pump station. The second priority identified in the report is to provide culinary water to North Needles which includes drilling a new well, constructing a new tank and installing pipe all within the North Needles Area. These improvements are not needed immediately but planning for them should begin now.

## Similar Engagements with Other Governmental Entities

Businesses have an incentive to underreport sales as doing so may reduce their tax liability; therefore, it is important to have mechanisms to identify and discourage intentional underreporting. To ensure the collection of proper tax revenue, the IRS established penalties to encourage compliance. The IRS stated that penalties encourage voluntary compliance by demonstrating the fairness of the tax system to compliant taxpayers and by increasing the cost of non-compliance.

The cash-intensive nature of cannabis businesses may increase the risk of underreporting sales and, in turn, underpayment of taxes. Additionally, various studies performed by the IRS and the General Accounting Office, a government agency that investigates how the federal government spends taxpayer dollars, indicate that there is an increase in underreporting of income for taxpayers with the ability to self-report income.

Our approach is tailored to meet all technical requirements while maintaining professional skepticism without forgetting that we provide a service. We are able to achieve this by partner involvement in all phases of the examination and assigning experienced governmental auditors to the engagement. Partner involvement will result in decisions being made on a timely basis, and experienced auditors will minimize disruption to City and Cannabis Businesses (Entity) staff.

RE: Marijuana Tax Audits

**Subject:** Proposal to Provide Auditing Services of Commercial Cannabis Businesses in Needles, CA

Dear Mr. Jones,

GreenGrowth CPAs is pleased to present to you our proposal to provide professional auditing services of commercial cannabis businesses in the City of Needles. The City's auditing needs, specifically for existing cannabis business operators, is of paramount importance and requires specific skill sets and experience in order to determine whether operators are reporting accurately or fraudulently. Given the highly regulated and lucrative nature of the industry, we believe that our extensive experience with cannabis businesses and auditing are best suited to providing these services.

We are a boutique CPA firm that provides accounting and auditing services to over 300 cannabis businesses all over the country. Our team has come out of Big Four firms and has taken its training, industry knowledge, and experience to the cannabis industry in order to provide the financial services and direction it so desperately needs. We are well versed with typical operating costs of running such businesses and other business operations related to the unique financial situation of cannabis businesses. We have the necessary knowledge, experience, and expertise on cannabis industry regulations, licensing procedures, accounting and auditing requirements, as well as a comprehensive understanding of the issues that the industry and its operators face that heavily influence how cannabis businesses should be audited for finances and regulatory compliance. To date, we've helped the federal government collect more than \$12 million in tax revenues by making sure our Clients are compliant and paying their applicable taxes.

We are submitting a proposal for auditing services for cannabis business operators in the City, that includes five (5) audits. The audits will validate or refute the accuracy of the bookkeeping, operational costs, and payment of required taxes and contribution to the City's General Fund. Audits will be performed at various times throughout the year for each cannabis business. The contract will be for two (2) years commencing the date of agreement, upon approval by the City Council.

GreenGrowth CPAs is committed to devoting the necessary resources to complete the work described in this proposal. Armed with our extensive experience in providing financial and consulting services to cannabis business operators, a deep understanding of the nature of the industry and its emerging issues that directly affect the operators, and our ability to work with clients and their staff to implement complex accounting and reporting pronouncements, we are certain we will meet and exceed the City's requirements. We are confident that as you plan for your future needs, you will be convinced that GreenGrowth CPAs is your best choice. We appreciate the opportunity to present our proposal to serve the City. ## OVERVIEW

GreenGrowth CPAs is a boutique CPA firm that provides accounting and auditing services to over 300 cannabis businesses all over the country. Our team is well versed with typical operating costs of running such businesses, their complexities and nuances involved in tax compliance with regards to cannabis businesses.

## QUALIFICATIONS AND EXPERIENCE

**Marko Glisic, CPA, Partner**

---

### **GreenGrowth CPAs, Partner**

- Prepared pro-forma financial statements projecting profit and loss and cash flows for dozens of cannabis companies consisting of cultivation, manufacturing/extraction, and dispensary/delivery operations. This experience provided an insight into the key metrics driving cannabis businesses' operations and financials – square footage of canopy, average customer spend per transaction etc. – and thus the ability to analytically assess financials of cannabis businesses.
- Performed dozens of audit and due diligence engagements of cannabis operators ranging from dispensaries with a couple of million of revenues to \$20 million vertically integrated operators that have cultivation, manufacturing, and distribution operations. This experience provided an insight into the operations and challenges cannabis operators face. Some of the recurring observations in these projects are that significant number of cannabis operators have discrepancies in cash, which in some cases range up to \$200,000.
- Prepared financial statements (profit and loss statement and balance sheet) and sales tax returns on a monthly basis for 18 cannabis operations consisting of cultivation, manufacturing/extraction, and dispensary/delivery operations. This experience provided insight into the processes that are necessary to generate accurate and complete financials,

and also where the majority of cannabis operators fail. Some of the recurring observations in these projects are that cannabis operators tend to incorrectly remove excise tax from revenues to calculate sales tax, or incorrectly apply the definition of gross receipts for local returns.

### **Webjoint, Outsourced CFO**

- Outsource accounting/finance services for a Series A SaaS (software as a service) startup that provides point of sale software to cannabis dispensaries and deliveries.
- Assisted the Webjoint team in developing the software that is compliant with the regulations and sales and local tax frameworks.

### **Deloitte & Touch LLP, Audit Senior Manager**

- Top rated manager in Consumer Products & Agricultural Industry – consistently rated a 1 and 2 on a 1 (highest) to 5 (lowest) scale.
- Audited financials and analyzed cash flows for various clients in retail, manufacturing, and agriculture industries, ranging in revenues from \$40 million to over \$4 billion.
- Lead audit manager on a large international agricultural public entity:
  - a) Managed a budget of over 12,000 hours;
  - b) Led a team of 10 auditors and oversaw the work of 8 international divisional teams consisting of 10 auditors each;
  - c) Executed and oversaw all phases of the audit process including planning, substantive testing, financial analysis and reporting, review and analysis of internal control over financial reporting and presentation of audit findings to management; and
  - d) Led the team to audit \$1.2 billion going-private transaction.
- Client portfolio consisted of 4 large clients per year on average, with project timing occasionally overlapping.
- Worked as an audit manager on an initial public offering (IPO) of a \$ 4 billion agricultural company.
- Worked as an audit manager on multiple debt offerings amounting to over \$300 million on agricultural company.

## SCOPE AND AUDIT APPROACH

### **General Audit Approach:**

Our philosophy for a successful engagement is based on planning, organization, communication, and coordination between us, the CPA firm, and the cannabis operator. In addition, we will meet with the appropriate city personnel on a regular basis to report on the progress of our audit and on our preliminary audit findings.

The Green Growth CPAs audit approach is tailored to meet the specific needs of each project. We will leverage off our experience base of over 300 cannabis clients and build upon our deep understanding of the cannabis operators. As conditions change, we will continue to develop our understanding of critical audit areas through comprehensive audit planning and risk assessment. Our audit approach entails an analysis of audit risks leading to a focus of audit effort.

Broadly, the following phases outline our audit approach:

*Agree terms of engagement* - We first agree with the City on the objectives of the engagement and the nature and timing of our reports. In addition, the objectives are communicated to a cannabis operator.

*Gather information* - We develop an understanding of the cannabis operator's business, information system and organization, and the ways in which management exercises control.

*Develop audit strategy* - Based on our knowledge, we then move to a detailed assessment of the

risks potentially affecting the financial statements and bookkeeping process. A client-specific audit strategy is then developed, focusing our audit efforts on financial statement areas where there are significant risks of material misstatement, whether due to fraud or error. We select those procedures which will provide us with the necessary evidence with optimum timing and efficiency. Our sampling and analytical procedures are outlined in more detail below.

*Execute the audit* - We then perform the selected audit procedures, ensuring that they are carried out by staff who have a level of experience and knowledge relevant to the planned procedures. The results are evaluated to determine whether we have sufficient appropriate audit evidence or whether additional procedures need to be performed.

*Report* - We report on other matters covered by the terms of our engagement. Throughout the audit process we gain knowledge which, combined with our general experience and expertise, provides us with a unique insight into the cannabis operators' operations and with opportunities for identifying improvements, not only with respect to accounting and information systems but also regarding broader, and often more significant areas such as organizational structure and financial planning and compliance. Insight is often a source of valuable business advice to cannabis operators. (*See chart below.*)

Our audit approach is based on our experience working with cannabis entities over many years. The key element in performing a successful audit of a cannabis entity is to have knowledgeable professionals that know the cannabis industry and environment.

Our approach emphasizes comprehensive and timely audit planning. In order to perform the audit timely and meet or exceed your deadlines, we will work closely with your staff and cannabis operators while planning the engagement. Some of the techniques used:

- (1) Place timely requests of documents to a cannabis operator;
- (2) Establishing a Dropbox server where the documents can be securely and quickly uploaded;
- (3) Leverage deep knowledge of systems cannabis operators use (Meadows, Webjoint, Treez, MJ Freeway, Quickbooks, Xero etc.) and provide clear instructions outlining how the operator can give us access and provide necessary reports and support documentation; and

- (4) Regular meetings with the cannabis operator management and city personnel.

### Sampling Approach

Audit sampling is the application of an audit procedure to less than 100% of the items within an account balance or class of transactions for the purpose of evaluating the value of the balance or class. Substantive test sampling provides a technique for estimating the extent of monetary misstatement in a class of transactions or balances. Sampling can be very useful in performing substantive tests on, for example, sales, purchases, or accounts receivable.

Our audit approach encourages the use of statistical sampling whenever practical especially for substantive tests. In summary our sampling procedures include the following:

1. Define the Objective
2. Define the Population and the Sampling Unit
3. Define Tolerable Misstatement
4. Remove Items for 100% Examination
5. Specify the Desired Level of Sampling Assurance and the Acceptable Risk of Over auditing
6. Estimate the Expected (Anticipated) Misstatement
7. Select the Sampling Technique (e.g., non-statistical, PPS, SRS)
8. Determine the Sample Size
9. Select the Sample
10. Examine the Sample Items and Evaluate the Sample Results

### Analytical Procedures

AICPA defines analytical procedures as:

“Evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount.”

Our audit approach strongly encourages substantive analytical procedures as it results in high levels of assurance and efficiency. Through our deep understanding of key metrics driving cannabis businesses, developed from working with over 300 cannabis operators, and access to reputable industry reports, we are able to develop substantive analytical procedures for revenues and other classes of transaction and account balances. Some of the key metrics we tend to leverage are:

## Key Metrics for Vertical Specific Activity

Retail Dispensary	Cultivation	Manufacturing
Average spend per transaction	Growing methodology (indoor with GAVITA lights, indoor with LED lights, greenhouse, outdoor)	Process extraction yields
Concentration of dispensaries in an area relative to population size	Square footage of canopy	Equipment capacity-type to audit revenues for a processor
Frequency of customer purchase	Yield per square foot to audit revenue	Wholesale mark up
Retail mark ups	Cost per pound	Cost per unit
expense contribution	Cost of good sold	Expense contribution
Headcount to audit gross margin	Headcount to audit gross margin	Headcount to audit gross margin

### Technology:

We view technology as a foundation for deploying and executing our audits. Technology is what allows us to execute audits with the highest levels of assurance and efficiency.

Our years of experience, we have provided us with deep insight into cannabis software operators use:

- (1) Webjoint
- (2) Meadows
- (3) Treez
- (4) Greenbits
- (5) MJ Freeway
- (6) BioTrack
- (7) Metrc

In addition, we leverage the following software:

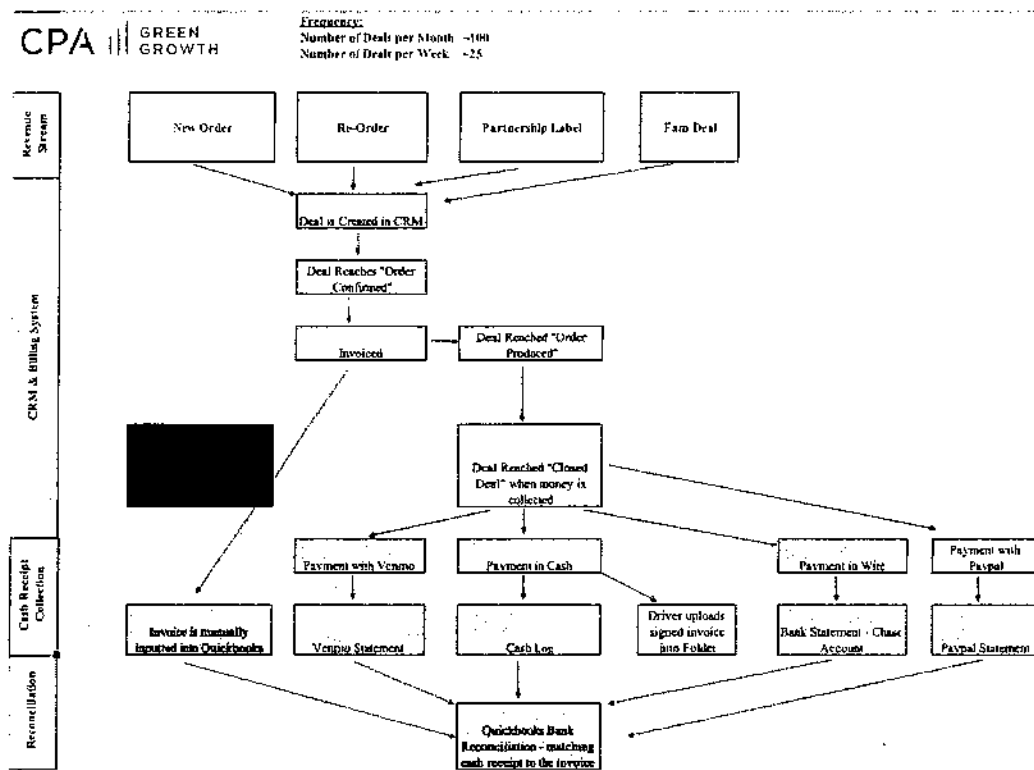

- (1) Asana – for efficient project management and communication
- (2) Dropbox – for secure and safe storage of operator documents
- (3) Zoom – for screen-sharing and remote deployment of some resources
- (4) Arbutus and ACL – for audit software

## Single Audit Approach:

Audit procedures would be as follows:

- (1) *Walkthrough the sales operational and accounting processes and flow chart them to identify control gaps and additional risks of material misstatement and fraud (see a sample flowchart below.)*

- (2) *Review CDTFA sales tax return and/or cannabis tax return and reconcile them to the sales per general ledger (See sample reconciliation below.)*

	Q2
Sales Tax Return	\$ 310,341
Sales per General Ledger	\$ 310,341
Difference	\$ -

Some of the issues we have discovered through our audit engagements in the past and working directly with cannabis operators is that excise taxes will be backed out of gross receipts to calculate sales tax. This results in a significant under-reporting of sales tax and diminishes the benefit sales tax program has given to the state and local programs. Please refer to the exposure analysis below:

Sales Tax Exposure Analysis			
	Low	High	Ref
Average Revenues for a Dispensary	2,000,000	6,000,000	<A>
Revenues + Excise Tax of 15%	2,300,000	6,900,000	<B>
Sales Tax Rate	0.1	0.1	<C>
Sales Tax Collected - INCORRECT	200,000	600,000	<A> * <C>
Sales Tax Collected - CORRECT	230,000	690,000	<B> * <C>
Exposure for 1 Dispensary	30,000	90,000	
Exposure for 8 Dispensaries	240,000	720,000	
Exposure for 16 Dispensaries	480,000	1,440,000	

(3) Review local city return and reconcile it to the sales per general ledger.

The following lists some of the discrepancies we have observed in the past:

- (a) Cannabis operators have failed to report the correct amount due for clerical reasons, i.e. sales per return do not reconcile to the ledger
- (b) Cannabis operators incorrectly interpreting the definition of gross receipts or taxable receipts by including things such as cost of goods sold.
- (c) Cannabis operators treating the local tax as a sales tax and passing it onto customers. This results in misrepresentation of local tax code, burden on local community, and under-reporting. Please refer to exposure analysis below.

Local Tax Exposure Analysis			
	Low	High	Ref
Revenues	2,000,000	6,000,000	<A>
Local Tax Collected from Customer at 10%	200,000	600,000	<B> = <A> * 10%
Gross Receipts	2,200,000	6,600,000	<A> + <B>
Local Tax	0.1	0.1	<C>
REPORTED Local Tax - INCORRECT	200,000	600,000	<A> * <C>

We have deep knowledge of cannabis software, such as Meadows, Webjoint, Treez, MJ Freeway, which allows us to identify discrepancies in configuration or maintenance of the system (sales tax calculation is configured incorrectly, data being removed from the system etc.). Through this procedure, we identify under-reporting of gross receipts coming into business. We have had cases where discrepancies would amount to tens of thousands of dollars.

(5) Perform substantive analytical procedures over revenues (See sample below.)

Cultivator Substantive Analytic

Systems and physical records can be tempered with. This is where analytical procedures combined with deep industry knowledge assist us to discover any discrepancies in reported revenues.

*(6) Review cash logs and general ledger for unusual entries and activity*

Consistent with the above risks, we want to focus our procedures on unusual activity to discover any unusual entries that would result in under-reporting of sales, i.e. entries between sales and expenses (debit to sales and credit expense). This is accomplished through review of cash logs and general ledger for unusual entries or activity.

*(7) Observe cash count and inspect cash log to general ledger reconciliation and bank reconciliation*

One of the main challenges for the cannabis industry is banking, which results in cannabis operators conducting the majority of transactions in cash. According to *Annual Marijuana Business*

*Factbook 2018*, 72% of cannabis operators take only cash as a form of payment.

This fosters a perfect environment for misappropriation of cash and misreporting of revenues and gross receipts due to fraud or a lack of controls. Simply put, if books don't reconcile on a cash basis, a cannabis operator can easily mis-represent revenues and expenses.

Consequently, we view observation of cash count and cash reconciliations as an integral part of our audits.

We make use of comprehensive checklists that are geared towards specific task and procedures. These checklists ensure that all information and proper protocol is followed and kept when performing financial and compliance/regulatory audits.

#### Sample Cash Observation Checklist:

Organization: ABC Company Inc.	Cash Count Audit Program
DATE of Count: 12/31/2017	Audit Checklist Performed by: Dominique Shakrany, Audit Staff
TIME of Count: 2:15 pm	Reviewed by: Marko Glisic, Engagement Partner

##### GENERAL INSTRUCTIONS:

- Don't take bags (i.e. backpacks, workbags, etc.) with you to the cash count and avoid wearing baggy clothing or clothing with many pockets as you want to avoid the risk of cash or inventory items ending up in your bag/belongings.
- Don't touch the cash at any point or any other inventory items you come across. The client will be the one responsible for handling all cash.
- Keep hands visible throughout the cash count. Avoid putting hands in your pockets.
- Bring pen, calculator and print this document to take notes of the process.

PROCEDURE	STAFF	YES/NO/N/A	COMMENTS FOR "NO" ANSWERS
I. Planning:			
a. Coordinate with appropriate client personnel (including Management) the following:			
i. Date and timing of cash counts	DS	Yes	
ii. Access levels and required escorts for on the floor, in Surveillance, etc., and confirm company's management will have enough personnel to meet all escort needs during the cash count for the various auditors.	DS	Yes	
b. Inquire of cash count personnel whether there is cash located outside of the cash room. If so, ensure the cash located outside of the room is included within count procedures.	DS	Yes	
c. Inspect the facility and ensure there are video cameras inside and outside the room where the safe/vault(s) is/are.	DS	Yes	

Through this procedure we have uncovered discrepancies between actual cash and the ledger ranging from \$10,000 to \$200,000, and as a result developed analytical procedures to estimate under-reported revenues based on the discrepancy.

We believe, based on experience working with over 300 cannabis operators, that the sum of the above procedures would yield the **highest levels of assurance, revenue recovery, while being the most efficient.**

## EMERGING CANNABIS ISSUES

### Banking

One of the most pressing issues in the cannabis industry to date is banking. Since cannabis is still considered a Schedule I drug, and is illegal federally, financial institutions are very careful and reluctant to offer services to cannabis businesses. This has led to great difficulty for cannabis business operators in securing, investing, and keeping track of their profits. Furthermore, cannabis business and communities they operate in have been exposed to higher levels of violence and theft. As such, our firm recognizes that it is our fiduciary duty to our clients, to proactively rally behind this issue to determine and develop compliant and creative solutions to this problem.

Our firm has established, and continues to foster a strong working relationship with influential policy makers, such as Fiona Ma, California's State Treasurer, who has taken an open and supportive stance on this issue. One of such efforts has been the Banking event that our firm hosted with Fiona Ma as our keynote speaker on October 25, 2018.

We have also developed relationships with other financial institutions that **legally** provide services to our cannabis operator clients. As such, we intend to bring our relationships to Needles Cannabis Business Operators, in order to improve their operations by providing banking options, compliant and effective procedures to ensure accurate book-keeping, and clear paper trails that allow for easier and comprehensive auditing.

## Licensing and Regulations

Given the highly regulated nature of the cannabis industry, a constant issue is compliance. Our firm is well versed and equipped to handle the various complex regulatory frameworks, both from the operations aspect, as well as the financial aspect. We have provided financial and regulatory review and guidance services to hundreds of cannabis businesses across the country, who now operate within the expected operational and financial regulatory structures mandated by local and state authorities.

Our services cover all aspects of operational and financial/tax requirements such as tax planning, filing, recordkeeping, auditing, development and review of internal policies and operating procedures, as well as developing employee training modules that cover access and use of cannabis business software, and education on local and state laws and regulations.

## Software

To date, there are almost a hundred various types of cannabis software solutions that cater to seed-to-sale tracking, point-of-sale systems, delivery, and operations management. The one thing these software solutions have in common is their ability to keep users compliant within the operational and financial regulatory frameworks dictated by state and federal government.

Our firm has worked with several of the leading software solutions to bring forth comprehensive and accurate software solutions for point-of-sale systems that tie in with record keeping, book keeping, and inventory controls. These software solutions serve various purposes integral to operating compliant cannabis businesses, particularly where it concerns:

- Seed-to-Sale Tracking
- Compliance with local, State and Federal Regulations
- Reporting and Accounting Processes

Our firm Partner, Marko Glisic, CPA, has been involved with software solution development and is also, currently the CFO for Webjoint, a cannabis retail software for dispensaries and delivery services. This experience has allowed our firm to offer regulatory guidance to cannabis business clients that sets their operations apart from other operators. Our firm recognizes the importance of choosing the best software solution to seamlessly integrate operations and compliance.

The NRA also conducts multiple programs to train citizens on the safe and effective use of firearms and personal safety. Over 1 million citizens participate annually in safety training. **Background:** On March 12, 2019 the City Council approved Resolution No. 2019-8 which established an Economic Development Program that is designed to assist new and existing non-cannabis businesses with costs associated with infrastructure improvements, fees, and startup costs that encourage improvements and investment in commercial properties within the City of Needles.

Greens Development is a privately held real estate development and hotel company that has steadily grown its market presence by investing prudently, managing effectively, and operating efficiently. The company currently has nine (9) hotels under development and operates ten (10) hotels/motels including the Quality Inn/ Rodeway Inn Needles.

Greens Needles, LLC has submitted an Economic Development Program Application in the amount of \$104,456.40. The funds will be used to offset construction costs by paying for City fees and infrastructure improvements. The applicant meets the requirements to be eligible for the Economic Development Program Grant Funds due to the fact:

1. The applicant is operating a new separate non-cannabis business with a physical location in the City.
2. The applicant is providing a private investment that is at least twice the amount of the requested grant.

## Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. **DO NOT** use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened.** **DO NOT** send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do **NOT** reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

November 11, 2019

Attn: Cindy Semione, Planning Department

Re; Extension of Time: CUP's 2017-94 through 101, inclusive

Dear Mr. Daniels,

Deer Park Development Corporation's eight CUP's were approved by Needles City Council Resolutions No. 2017-94 through 2017-101, inclusive, on December 19, 2017. These CUP's were subsequently extended by the City Council and are now scheduled to expire on December 11, 2019.

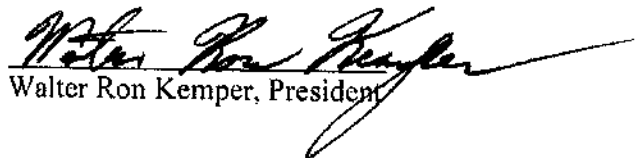

Deer Park Development Corporation has diligently progressed on their project by correcting a building encroachment on two of their buildings with a Lot Line Adjustment and recorded Certificate of Compliance. They have filed and received approval of a Lot Merger Application and await the City's preparation of an additional Certificate of Compliance. Deer Park has also prepared and filed a second Lot Line Adjustment to adjust the Merger lines to fit the existing buildings and eliminate the current conflicting lot boundaries. This will give Deer Park sellable lots and the ability to attract financing to complete the various requirements of the CUP's.

Additionally, Deer Park Development Corporation has aggressively marketed their project by actively listing the property for sale through Costar and LoopNet and has developed a website (greenmedicalcenter.net) to facilitate their marketing effort. This effort has brought significant international attention to the project and to the City of Needles.

Deer Park Development Corporation hereby respectfully requests a six month or longer extension of time to allow for the completion of the Lot Merger and Lot Line Adjustment, as well as the extensive Conditions of Approval of their eight CUP's.

If you need additional information, or have any questions, please call.

Sincerely,

  
Walter Ron Kemper, President

Re: Conditional Use Permit# 11-07-2018-2-PC and 11-07-2018-3PC

Dear Cindy

We are writing you in order to be in compliance with the requirements and to request a 6 month extension of time for our Conditional Use Permits (herein referred to as CUP) for the property Located at 2208 Needles Highway, Needles. Permit numbers as stated above.

We need the extension of time because; Being able to get an Engineer has been difficult. Bill Cyr was kind enough to recommend Dan Cline who, at first, was difficult to reach, then sent us an estimate, but during that time I was travelling back and forth To New York as I was getting married. Unfortunately, upon my return I could not get in touch with him.

The need for the extension is due to the fact that I was finally able to find a contractor who is willing to go out to Needles, he is in the process of drawing plans and getting me the bid To bring the property in compliance with the needles request. We anticipate this taking approximately 6 months whether permitting,

My assistant was finally able to reach him, after numerous attempts and was told that he was too busy to even have a discussion. We were ready to send a deposit to begin the process but instead we are back to having to locate another Engineer to continue and complete the plans.

Our goal and intent is to obtain the certificate of occupancy in order to get the business up and running as soon as possible.

I appreciate your input and the planning committee's consideration for extending our CUP's for an additional six (6) months.

Respectfully submitted

  
David M Posner

## Similar Engagements with Other Governmental Entities

Businesses have an incentive to underreport sales as doing so may reduce their tax liability; therefore, it is important to have mechanisms to identify and discourage intentional underreporting. To ensure the collection of proper tax revenue, the IRS established penalties to encourage compliance. The IRS stated that penalties encourage voluntary compliance by demonstrating the fairness of the tax system to compliant taxpayers and by increasing the cost of non-compliance.

The cash-intensive nature of cannabis businesses may increase the risk of underreporting sales and, in turn, underpayment of taxes. Additionally, various studies performed by the IRS and the General Accounting Office, a government agency that investigates how the federal government spends taxpayer dollars, indicate that there is an increase in underreporting of income for taxpayers with the ability to self-report income.

Our approach is tailored to meet all technical requirements while maintaining professional skepticism without forgetting that we provide a service. We are able to achieve this by partner involvement in all phases of the examination and assigning experienced governmental auditors to the engagement. Partner involvement will result in decisions being made on a timely basis, and experienced auditors will minimize disruption to City and Cannabis Businesses (Entity) staff.

RE: Marijuana Tax Audits

**Subject:** Proposal to Provide Auditing Services of Commercial Cannabis Businesses in Needles, CA

Dear Mr. Jones,

GreenGrowth CPAs is pleased to present to you our proposal to provide professional auditing services of commercial cannabis businesses in the City of Needles. The City's auditing needs, specifically for existing cannabis business operators, is of paramount importance and requires specific skill sets and experience in order to determine whether operators are reporting accurately or fraudulently. Given the highly regulated and lucrative nature of the industry, we believe that our extensive experience with cannabis businesses and auditing are best suited to providing these services.

We are a boutique CPA firm that provides accounting and auditing services to over 300 cannabis businesses all over the country. Our team has come out of Big Four firms and has taken its training, industry knowledge, and experience to the cannabis industry in order to provide the financial services and direction it so desperately needs. We are well versed with typical operating costs of running such businesses and other business operations related to the unique financial situation of cannabis businesses. We have the necessary knowledge, experience, and expertise on cannabis industry regulations, licensing procedures, accounting and auditing requirements, as well as a comprehensive understanding of the issues that the industry and its operators face that heavily influence how cannabis businesses should be audited for finances and regulatory compliance. To date, we've helped the federal government collect more than \$12 million in tax revenues by making sure our Clients are compliant and paying their applicable taxes.

We are submitting a proposal for auditing services for cannabis business operators in the City, that includes five (5) audits. The audits will validate or refute the accuracy of the bookkeeping, operational costs, and payment of required taxes and contribution to the City's General Fund. Audits will be performed at various times throughout the year for each cannabis business. The contract will be for two (2) years commencing the date of agreement, upon approval by the City Council.

GreenGrowth CPAs is committed to devoting the necessary resources to complete the work described in this proposal. Armed with our extensive experience in providing financial and consulting services to cannabis business operators, a deep understanding of the nature of the industry and its emerging issues that directly affect the operators, and our ability to work with clients and their staff to implement complex accounting and reporting pronouncements, we are certain we will meet and exceed the City's requirements. We are confident that as you plan for your future needs, you will be convinced that GreenGrowth CPAs is your best choice. We appreciate the opportunity to present our proposal to serve the City. If you have any questions, or if we can be of assistance to you in any way during your proposal or selection process, please do not hesitate to contact us at:

Our team is well versed with typical operating costs of running such businesses, their complexities and nuances involved in tax compliance with regards to cannabis businesses.

## QUALIFICATIONS AND EXPERIENCE

**Marko Glisic, CPA, Partner**

---

### **GreenGrowth CPAs, Partner**

- Prepared pro-forma financial statements projecting profit and loss and cash flows for dozens of cannabis companies consisting of cultivation, manufacturing/extraction, and dispensary/delivery operations. This experience provided an insight into the key metrics driving cannabis businesses' operations and financials – square footage of canopy, average customer spend per transaction etc. – and thus the ability to analytically assess financials of cannabis businesses.
- Performed dozens of audit and due diligence engagements of cannabis operators ranging from dispensaries with a couple of million of revenues to \$20 million vertically integrated operators that have cultivation, manufacturing, and distribution operations. This experience provided an insight into the operations and challenges cannabis operators face. Some of the recurring observations in these projects are that significant number of cannabis operators have discrepancies in cash, which in some cases range up to \$200,000.
- Prepared financial statements (profit and loss statement and balance sheet) and sales tax returns on a monthly basis for 18 cannabis operations consisting of cultivation, manufacturing/extraction, and dispensary/delivery operations. This experience provided insight into the processes that are necessary to generate accurate and complete financials,

and also where the majority of cannabis operators fail. Some of the recurring observations in these projects are that cannabis operators tend to incorrectly remove excise tax from revenues to calculate sales tax, or incorrectly apply the definition of gross receipts for local returns.

### **Webjoint, Outsourced CFO**

- Outsource accounting/finance services for a Series A SaaS (software as a service) startup that provides point of sale software to cannabis dispensaries and deliveries.
- Assisted the Webjoint team in developing the software that is compliant with the regulations and sales and local tax frameworks.

### **Deloitte & Touch LLP, Audit Senior Manager**

- Top rated manager in Consumer Products & Agricultural Industry – consistently rated a 1 and 2 on a 1 (highest) to 5 (lowest) scale.
- Audited financials and analyzed cash flows for various clients in retail, manufacturing, and agriculture industries, ranging in revenues from \$40 million to over \$4 billion.
- Lead audit manager on a large international agricultural public entity:
  - a) Managed a budget of over 12,000 hours;
  - b) Led a team of 10 auditors and oversaw the work of 8 international divisional teams consisting of 10 auditors each;
  - c) Executed and oversaw all phases of the audit process including planning, substantive testing, financial analysis and reporting, review and analysis of internal control over financial reporting and presentation of audit findings to management; and
  - d) Led the team to audit \$1.2 billion going-private transaction.
- Client portfolio consisted of 4 large clients per year on average, with project timing occasionally overlapping.
- Worked as an audit manager on an initial public offering (IPO) of a \$ 4 billion agricultural company.

## SCOPE AND AUDIT APPROACH

### **General Audit Approach:**

Our philosophy for a successful engagement is based on planning, organization, communication, and coordination between us, the CPA firm, and the cannabis operator. In addition, we will meet with the appropriate city personnel on a regular basis to report on the progress of our audit and on our preliminary audit findings.

The Green Growth CPAs audit approach is tailored to meet the specific needs of each project. We will leverage off our experience base of over 300 cannabis clients and build upon our deep understanding of the cannabis operators. As conditions change, we will continue to develop our understanding of critical audit areas through comprehensive audit planning and risk assessment. Our audit approach entails an analysis of audit risks leading to a focus of audit effort.

Broadly, the following phases outline our audit approach:

*Agree terms of engagement* - We first agree with the City on the objectives of the engagement and the nature and timing of our reports. In addition, the objectives are communicated to a cannabis operator.

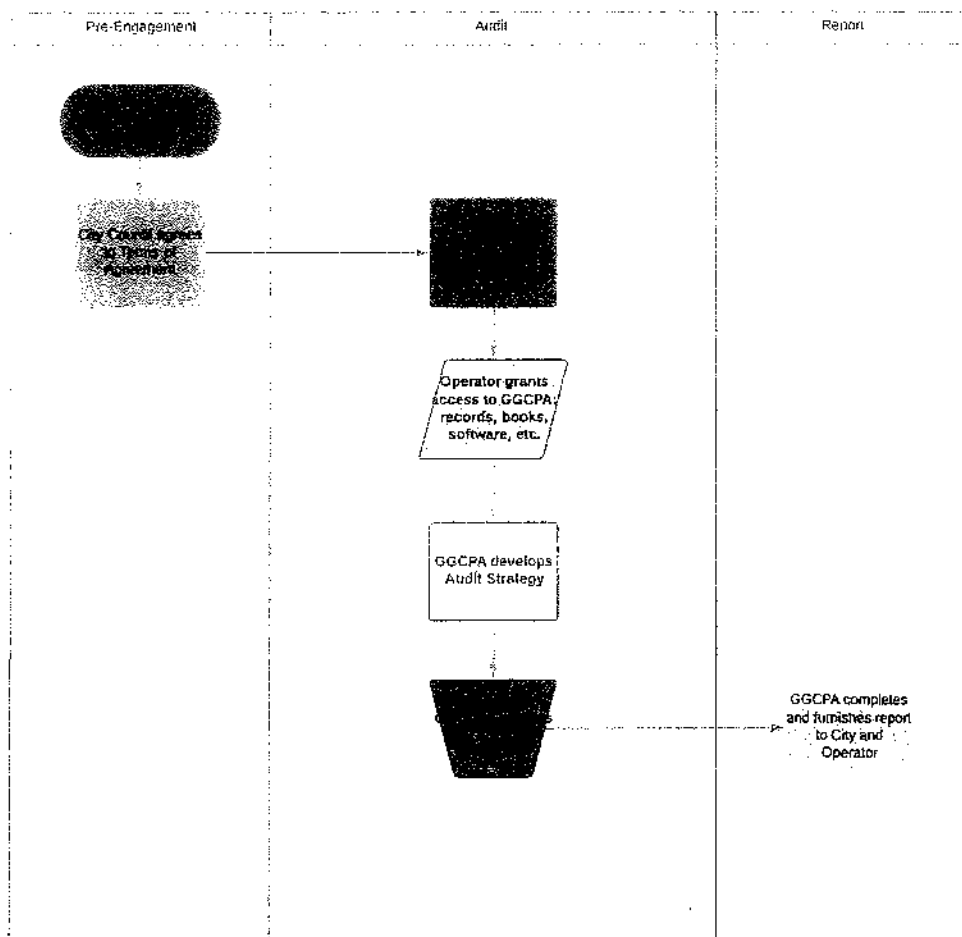

*Gather information* - We develop an understanding of the cannabis operator's business, information system and organization, and the ways in which management exercises control.

*Develop audit strategy* - Based on our knowledge, we then move to a detailed assessment of the

risks potentially affecting the financial statements and bookkeeping process. A client-specific audit strategy is then developed, focusing our audit efforts on financial statement areas where there are significant risks of material misstatement, whether due to fraud or error. We select those procedures which will provide us with the necessary evidence with optimum timing and efficiency. Our sampling and analytical procedures are outlined in more detail below.

*Execute the audit* - We then perform the selected audit procedures, ensuring that they are carried out by staff who have a level of experience and knowledge relevant to the planned procedures. The results are evaluated to determine whether we have sufficient appropriate audit evidence or whether additional procedures need to be performed.

*Report* - We report on other matters covered by the terms of our engagement. Throughout the audit process we gain knowledge which, combined with our general experience and expertise, provides us with a unique insight into the cannabis operators' operations and with opportunities for identifying improvements, not only with respect to accounting and information systems but also regarding broader, and often more significant areas such as organizational structure and financial planning and compliance. Insight is often a source of valuable business advice to cannabis operators. (See chart below.)

Our audit approach is based on our experience working with cannabis entities over many years. The key element in performing a successful audit of a cannabis entity is to have knowledgeable professionals that know the cannabis industry and environment.

Our approach emphasizes comprehensive and timely audit planning. In order to perform the audit timely and meet or exceed your deadlines, we will work closely with your staff and cannabis operators while planning the engagement. Some of the techniques used:

- (1) Place timely requests of documents to a cannabis operator;
- (2) Establishing a Dropbox server where the documents can be securely and quickly uploaded;
- (3) Leverage deep knowledge of systems cannabis operators use (Meadows, Webjoint, Treez, MJ Freeway, Quickbooks, Xero etc.) and provide clear instructions outlining how the operator can give us access and provide necessary reports and support documentation; and

- (4) Regular meetings with the cannabis operator management and city personnel.

### Sampling Approach

Audit sampling is the application of an audit procedure to less than 100% of the items within an account balance or class of transactions for the purpose of evaluating the value of the balance or class. Substantive test sampling provides a technique for estimating the extent of monetary misstatement in a class of transactions or balances. Sampling can be very useful in performing substantive tests on, for example, sales, purchases, or accounts receivable.

Our audit approach encourages the use of statistical sampling whenever practical especially for substantive tests. In summary our sampling procedures include the following:

1. Define the Objective
2. Define the Population and the Sampling Unit
3. Define Tolerable Misstatement
4. Remove Items for 100% Examination
5. Specify the Desired Level of Sampling Assurance and the Acceptable Risk of Over auditing
6. Estimate the Expected (Anticipated) Misstatement
7. Select the Sampling Technique (e.g., non-statistical, PPS, SRS)
8. Determine the Sample Size
9. Select the Sample
10. Examine the Sample Items and Evaluate the Sample Results

### Analytical Procedures

AICPA defines analytical procedures as:

“Evaluations of financial information through analysis of plausible relationships among both financial and nonfinancial data. Analytical procedures also encompass such investigation, as is necessary, of identified fluctuations or relationships that are inconsistent with other relevant information or that differ from expected values by a significant amount.”

Our audit approach strongly encourages substantive analytical procedures as it results in high levels of assurance and efficiency. Through our deep understanding of key metrics driving cannabis businesses, developed from working with over 300 cannabis operators, and access to reputable industry reports, we are able to develop substantive analytical procedures for revenues and other classes of transaction and account balances. Some of the key metrics we tend to leverage are:

## Key Metrics for Vertical Specific Activity

Retail Dispensary	Cultivation	Manufacturing
Average spend per transaction	Growing methodology (indoor with GAVITA lights, indoor with LED lights, greenhouse, outdoor)	Process extraction yields
Concentration of dispensaries in an area relative to population size	Square footage of canopy	Equipment capacity/type to audit revenues for a processor
Frequency of customer purchase	Yield per square foot to audit revenue	Wholesale mark up
Retail mark ups	Cost per pound	Cost per unit
expense contribution	Cost of good sold	Expense contribution
Headcount to audit gross margin	Headcount to audit gross margin	Headcount to audit gross margin

### Technology:

We view technology as a foundation for deploying and executing our audits. Technology is what allows us to execute audits with the highest levels of assurance and efficiency.

Our years of experience, we have provided us with deep insight into cannabis software operators use:

- (1) Webjoint
- (2) Meadows
- (3) Treez
- (4) Greenbits
- (5) MJ Freeway
- (6) BioTrack
- (7) Metrc

In addition, we leverage the following software:

- (1) Asana – for efficient project management and communication
- (2) Dropbox – for secure and safe storage of operator documents
- (3) Zoom – for screen-sharing and remote deployment of some resources
- (4) Arbutus and ACL – for audit software

## Single Audit Approach:

Audit procedures would be as follows:

- (1) *Walkthrough the sales operational and accounting processes and flow chart them to identify control gaps and additional risks of material misstatement and fraud (see a sample flowchart below.)*

- (2) *Review CDTFA sales tax return and/or cannabis tax return and reconcile them to the sales per general ledger (See sample reconciliation below.)*

	Q2
Sales Tax Return	\$ 310,341
Sales per General Ledger	\$ 310,341
Difference	\$ -

Some of the issues we have discovered through our audit engagements in the past and working directly with cannabis operators is that excise taxes will be backed out of gross receipts to calculate sales tax. This results in a significant under-reporting of sales tax and diminishes the benefit sales tax program has given to the state and local programs. Please refer to the exposure analysis below:

Sales Tax Exposure Analysis			
	Low	High	Ref
Average Revenues for a Dispensary	2,000,000	6,000,000	<A>

Exposure for 8 Dispensaries	240,000	720,000	
Exposure for 16 Dispensaries	480,000	1,440,000	

(3) Review local city return and reconcile it to the sales per general ledger.

The following lists some of the discrepancies we have observed in the past:

- (a) Cannabis operators have failed to report the correct amount due for clerical reasons, i.e. sales per return do not reconcile to the ledger
- (b) Cannabis operators incorrectly interpreting the definition of gross receipts or taxable receipts by including things such as cost of goods sold.
- (c) Cannabis operators treating the local tax as a sales tax and passing it onto customers. This results in misrepresentation of local tax code, burden on local community, and under-reporting. Please refer to exposure analysis below.

Local Tax Exposure Analysis			
	Low	High	Ref
Revenues	2,000,000	6,000,000	<A>

(4) Review Point of Sale System ("POS") or billing system data and reconcile it to sales per general ledger (See sample POS data reconciliation to Sales Ledger below.)

We have deep knowledge of cannabis software, such as Meadows, Webjoint, Treez, MJ Freeway, which allows us to identify discrepancies in configuration or maintenance of the system (sales tax calculation is configured incorrectly, data being removed from the system etc.). Through this procedure, we identify under-reporting of gross receipts coming into business. We have had cases where discrepancies would amount to tens of thousands of dollars.

(5) Perform substantive analytical procedures over revenues (See sample below.)

Cultivator Substantive Analytic

Systems and physical records can be tempered with. This is where analytical procedures combined with deep industry knowledge assist us to discover any discrepancies in reported revenues.

*(6) Review cash logs and general ledger for unusual entries and activity*

Consistent with the above risks, we want to focus our procedures on unusual activity to discover any unusual entries that would result in under-reporting of sales, i.e. entries between sales and expenses (debit to sales and credit expense). This is accomplished through review of cash logs and general ledger for unusual entries or activity.

*(7) Observe cash count and inspect cash log to general ledger reconciliation and bank reconciliation*

One of the main challenges for the cannabis industry is banking, which results in cannabis operators conducting the majority of transactions in cash. According to *Annual Marijuana Business*

*Factbook 2018*, 72% of cannabis operators take only cash as a form of payment.

This fosters a perfect environment for misappropriation of cash and misreporting of revenues and gross receipts due to fraud or a lack of controls. Simply put, if books don't reconcile on a cash basis, a cannabis operator can easily mis-represent revenues and expenses.

Consequently, we view observation of cash count and cash reconciliations as an integral part of our audits.

We make use of comprehensive checklists that are geared towards specific task and procedures. These checklists ensure that all information and proper protocol is followed and kept when performing financial and compliance/regulatory audits.

### Sample Cash Observation Checklist:

Organization: ABC Company Inc.	Cash Count Audit Program
DATE of Count: 12/31/2017	Audit Checklist Performed by: Dominique Shakrany, Audit Staff
TIME of Count: 2:15 pm	Reviewed by: Marko Glisic, Engagement Partner

#### GENERAL INSTRUCTIONS:

- Don't take bags (i.e. backpacks, workbags, etc.) with you to the cash count and avoid wearing baggy clothing or clothing with many pockets as you want to avoid the risk of cash or inventory items ending up in your bag/belongings.
- Don't touch the cash at any point or any other inventory items you come across. The client will be the one responsible for handling all cash.
- Keep hands visible throughout the cash count. Avoid putting hands in your pockets.
- Bring pen, calculator and print this document to take notes of the process.

PROCEDURE	STAFF	YES/NO/N/A	COMMENTS FOR "NO" ANSWERS
I. Planning:			
a. Coordinate with appropriate client personnel (including Management) the following:			
i. Date and timing of cash counts	DS	Yes	
ii. Access levels and required escorts for on the floor, in Surveillance, etc., and confirm company's management will have enough personnel to meet all escort needs during the cash count for the various auditors.	DS	Yes	
b. Inquire of cash count personnel whether there is cash located outside of the cash room. If so, ensure the cash located outside of the room is included within count procedures.	DS	Yes	
c. Inspect the facility and ensure there are video cameras inside and outside the room where the safe/vault(s) is/are.	DS	Yes	

Through this procedure we have uncovered discrepancies between actual cash and the ledger ranging from \$10,000 to \$200,000, and as a result developed analytical procedures to estimate under-reported revenues based on the discrepancy.

We believe, based on experience working with over 300 cannabis operators, that the sum of the above procedures would yield the ***highest levels of assurance, revenue recovery, while being the most efficient.***

## EMERGING CANNABIS ISSUES

### Banking

One of the most pressing issues in the cannabis industry to date is banking. Since cannabis is still considered a Schedule I drug, and is illegal federally, financial institutions are very careful and reluctant to offer services to cannabis businesses. This has led to great difficulty for cannabis business operators in securing, investing, and keeping track of their profits. Furthermore, cannabis business and communities they operate in have been exposed to higher levels of violence and theft. As such, our firm recognizes that it is our fiduciary duty to our clients, to proactively rally behind this issue to determine and develop compliant and creative solutions to this problem.

Our firm has established, and continues to foster a strong working relationship with influential policy makers, such as Fiona Ma, California's State Treasurer, who has taken an open and supportive stance on this issue. One of such efforts has been the Banking event that our firm hosted with Fiona Ma as our keynote speaker on October 25, 2018.

We have also developed relationships with other financial institutions that **legally** provide services to our cannabis operator clients. As such, we intend to bring our relationships to Needles Cannabis Business Operators, in order to improve their operations by providing banking options, compliant and effective procedures to ensure accurate book-keeping, and clear paper trails that allow for easier and comprehensive auditing.

## Licensing and Regulations

Given the highly regulated nature of the cannabis industry, a constant issue is compliance. Our firm is well versed and equipped to handle the various complex regulatory frameworks, both from the operations aspect, as well as the financial aspect. We have provided financial and regulatory review and guidance services to hundreds of cannabis businesses across the country, who now operate within the expected operational and financial regulatory structures mandated by local and state authorities.

Our services cover all aspects of operational and financial/tax requirements such as tax planning, filing, recordkeeping, auditing, development and review of internal policies and operating procedures, as well as developing employee training modules that cover access and use of cannabis business software, and education on local and state laws and regulations.

## Software

To date, there are almost a hundred various types of cannabis software solutions that cater to seed-to-sale tracking, point-of-sale systems, delivery, and operations management. The one thing these software solutions have in common is their ability to keep users compliant within the operational and financial regulatory frameworks dictated by state and federal government.

Our firm has worked with several of the leading software solutions to bring forth comprehensive and accurate software solutions for point-of-sale systems that tie in with record keeping, book keeping, and inventory controls. These software solutions serve various purposes integral to operating compliant cannabis businesses, particularly where it concerns:

- Seed-to-Sale Tracking
- Compliance with local, State and Federal Regulations
- Reporting and Accounting Processes

Our firm Partner, Marko Glisic, CPA, has been involved with software solution development and is also, currently the CFO for Webjoint, a cannabis retail software for dispensaries and delivery services. This experience has allowed our firm to offer regulatory guidance to cannabis business clients that sets their operations apart from other operators. Our firm recognizes the importance of choosing the best software solution to seamlessly integrate operations and compliance.

WE ASSIGNED YOU AN EMPLOYER IDENTIFICATION NUMBER

Thank you for applying for an Employer Identification Number (EIN). We assigned you EIN 83-2611151. This EIN will identify you, your business accounts, tax returns, and documents, even if you have no employees. Please keep this notice in your permanent records.

When filing tax documents, payments, and related correspondence, it is very important that you use your EIN and complete name and address exactly as shown above. Any variation may cause a delay in processing, result in incorrect information in your account, or even cause you to be assigned more than one EIN. If the information is not correct as shown above, please make the correction using the attached tear off stub and return it to us.

Based on the information received from you or your representative, you must file the following form(s) by the date(s) shown.

We assigned you a tax classification based on information obtained from you or your representative. It is not a legal determination of your tax classification, and is not binding on the IRS. If you want a legal determination of your tax classification, you may request a private letter ruling from the IRS under the guidelines in Revenue Procedure 2004-1, 2004-1 I.R.B. 1 (or superseding Revenue Procedure for the year at issue). Note: Certain tax classification elections can be requested by filing Form 8832, *Entity Classification Election*. See Form 8832 and its instructions for additional information.

A limited liability company (LLC) may file Form 8832, *Entity Classification Election*, and elect to be classified as an association taxable as a corporation. If the LLC is eligible to be treated as a corporation that meets certain tests and it will be electing S corporation status, it must timely file Form 2553, *Election by a Small Business Corporation*. The LLC will be treated as a corporation as of the effective date of the S corporation election and does not need to file Form 8832.

## Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. **DO NOT** use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened.** **DO NOT** send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do **NOT** reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

November 11, 2019

Attn: Cindy Semione, Planning Department

Re; Extension of Time: CUP's 2017-94 through 101, inclusive

Dear Mr. Daniels,

Deer Park Development Corporation's eight CUP's were approved by Needles City Council Resolutions No. 2017-94 through 2017-101, inclusive, on December 19, 2017. These CUP's were subsequently extended by the City Council and are now scheduled to expire on December 11, 2019.

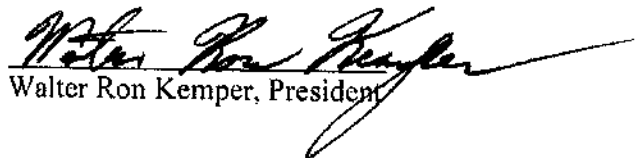

Deer Park Development Corporation has diligently progressed on their project by correcting a building encroachment on two of their buildings with a Lot Line Adjustment and recorded Certificate of Compliance. They have filed and received approval of a Lot Merger Application and await the City's preparation of an additional Certificate of Compliance. Deer Park has also prepared and filed a second Lot Line Adjustment to adjust the Merger lines to fit the existing buildings and eliminate the current conflicting lot boundaries. This will give Deer Park sellable lots and the ability to attract financing to complete the various requirements of the CUP's.

Additionally, Deer Park Development Corporation has aggressively marketed their project by actively listing the property for sale through Costar and LoopNet and has developed a website (greenmedicalcenter.net) to facilitate their marketing effort. This effort has brought significant international attention to the project and to the City of Needles.

Deer Park Development Corporation hereby respectfully requests a six month or longer extension of time to allow for the completion of the Lot Merger and Lot Line Adjustment, as well as the extensive Conditions of Approval of their eight CUP's.

If you need additional information, or have any questions, please call.

Sincerely,

  
Walter Ron Kemper, President

Re: Conditional Use Permit# 11-07-2018-2-PC and 11-07-2018-3PC

Dear Cindy

We are writing you in order to be in compliance with the requirements and to request a 6 month extension of time for our Conditional Use Permits (herein referred to as CUP) for the property Located at 2208 Needles Highway, Needles. Permit numbers as stated above.

We need the extension of time because; Being able to get an Engineer has been difficult. Bill Cyr was kind enough to recommend Dan Cline who, at first, was difficult to reach, then sent us an estimate, but during that time I was travelling back and forth To New York as I was getting married. Unfortunately, upon my return I could not get in touch with him.

The need for the extension is due to the fact that I was finally able to find a contractor who is willing to go out to Needles, he is in the process of drawing plans and getting me the bid To bring the property in compliance with the needles request. We anticipate this taking approximately 6 months whether permitting,

My assistant was finally able to reach him, after numerous attempts and was told that he was too busy to even have a discussion. We were ready to send a deposit to begin the process but instead we are back to having to locate another Engineer to continue and complete the plans.

Our goal and intent is to obtain the certificate of occupancy in order to get the business up and running as soon as possible.

I appreciate your input and the planning committee's consideration for extending our CUP's for an additional six (6) months.

Respectfully submitted

  
David M Posner
